Messe MünchenVisit us:
Hall A6, Booth 316**Circular economy needs cooperation**

They are lightweight, stable, flexible, protect products and ensure their safe transport. But plastic packaging has fallen into disrepute. For many, single used plastics are an environmental problem. Plastic floats in the sea and is found as a microplastic itself in organisms. But what to do? **Remember the appointment and come to the personal conversation to find solutions to strengthen recycling together.**

Dear Madam and Sir,**Our actions now determine the world of tomorrow**

From 4th to 8th May this year, the world's leading trade fair for environment and technology will once again open its doors in Munich. Exciting trade fair days, technical innovations, political discussions and lots of information await us.

RIGK will be back in the game, as in previous years. This time with a large joint stand together with our partner companies of the producers founded return systems GVÖ (container recycling company of the mineral oil industry), KBS (circular system for metal packaging) the startup plastship and our Spanish partner Sintac. Together with you, we would like to discuss, find solutions to the problems ahead and take the path of the circular economy together in the long term. We cordially invite you to visit us at our booth in Hall A6 Stand 316!

With this in mind, I wish you an exciting reading.

Sustainable greetings

Markus Dambeck
