

PLASTSHIP

Your plastic recycling network

We link up the value chain for recycled plastics to increase the use of sustainable resources.

Konstantin Humm & Andreas Bastian
Managing Directors of plastship GmbH

We are looking forward to meet you.

powered by

We want to increase the use of recycled plastics, develop new areas of application and establish sustainable material loops.

By providing structure, giving a maximum amount of information and offering **added-value services**, plastship helps to simplify and to save time in the **procurement and sales of recycled plastics**.

By our **calls for bids-system** we make top services from experts of the circular economy accessible for all users, to help taking every challenge you might face.

**We are
your network
for recycled
plastics.**

Suppliers of recycled plastics

- Tool to market your raw materials
- Greater market reach
- Increased visibility of your products
- Long-term contracts and spot transactions
- Procurement of recyclable materials

Buyers of recycled plastics

- Easier procurement of recycled plastics
- Qualified suppliers
- Comparability of recycled plastics materials
- Quality classification of regranulates
- Tool to market your recyclable materials

Brand owners

- Support in the application of regranulates
- Auditing of suppliers and/or recycled plastics suitable to your products
- Cooperation over the whole value chain
- Assessment of recyclability and optimization according to the idea of design for recycling

YOUR FUNCTIONS

Offer recycled plastics

- For regrinds, regranulates or compounds
- Improve the **visibility** of your **standard grades** and find customers easier
- Easy, **safe** and fast sale of **slow moving materials**
- **Market** production waste and surplus

Find recycled plastics

- Identify suitable recycled plastics grades based on your **requirements**
- Receive **automated notifications** as soon as fitting materials are available
- **Compare** the offers of different suppliers
- Request **raw materials & samples** and receive binding offers

Create calls for bids

- Get **raw materials specifically** designed for your application
- Get **access to services** like grinding, storage, sorting, granulation, analysing and many more
- Develop projects with **sustainable material loops**
- Get **audited** raw material suppliers for your project

Prepare offers

- **Detailed calls for bids** reduce your search effort
- Get all **information for creating offers** at a glance
- Easy and **uncomplicated offer preparations**
- Receive **more orders** by using our network effectively

HOW IT WORKS

01 Register at plastship.com and get **unlimited access to all of our functions**

02 We will get in touch with you and **present our solution** to you **personally, if desired**

03 Use our **uncomplicated** approach to create your services, offers or calls for bids online

04 Get **offers** and **requests** via plastship.com

05 Use [plastship](https://plastship.com) to organize **transactions** and execute your **projects**

It is possible to create offers and calls for bids anonymously. You decide if, when and to whom your data will be accessible. Our remuneration consists of a commission for a successful transaction - the amount is communicated before execution. Our fixed prices for analyses and the organization of transports can be found online as well.

OUR SERVICES

Our mission is to make the organization of your plastics recycling activities and the use of recycled plastics as easy as possible. We therefore provide you:

- Classification of recycled plastics for different applications
- Testing methods of recycled plastics to assess their quality and make them comparable
- Auditing of suppliers for specific projects
- Analyses and quality evaluations by our partners
- Structuring the sales and consulting regarding the online marketing of your recyclable materials
- Development of collection and recycling schemes for your products
- Consulting for the application of recycled plastics
- Organization of transportations and transactions

We assess and certify the recyclability of your packaging:

- Fast, uncomplicated and valid
- Cost-effective
- According to the minimum standard of ZSVR
- For whole product ranges as well

Communicate the results to your customers effectively.
