Dear Madam and Sir,

Think Global – Act Local

This year approximately 150 experts from 25 countries will once again meet at the International Recycling Forum in Wiesbaden to exchange information on plastics recycling and the circular economy. Besides numerous specialist lectures, the three-day event focusing on the closed substance cycle promotes lively discussions and provides a platform for educating each other.

The global solution to the waste problem requires local action. The sharing of knowledge and the rapid realisation of a global strategy for the prevention and the recycling of plastics waste characterise our consulting activities in this area. One good example for this is the joint project with Chile's Ministry of the Environment in a coastal protection zone. Following this path we are also making use of digitalisation and offer digitalised solutions with our 'plastship' start-up.

Join us at our International Recycling Forum in Wiesbaden – we can't wait to meet you!

Kind regards,

Markus Dambeck
General Manager

Chile: ACTIVE TODAY FOR A BETTER TOMORROW

The Chilean Ministry of the Environment has commissioned RIGK to produce a waste management plan for the coastal protection zone of Isla Grande de Atacama.
