## PACKAGING WITH CARE AND RESPONSIBILITY

Dear Madam and Sir,

Would the world be a better place without packaging? Packaging is necessary. It not only gives products a face, but also ensures transport and storage. But measures are also necessary to protect the environment and use resources responsibly. This is exactly why RIGK exists.

Our innovative take-back systems and recycling solutions for plastics and packaging are always one step ahead of the legal requirements – and so are our customers. This is also confirmed by the amendment to the German Packaging Act, which comes into force in July 2021. The new notification obligation we have already taken over for our customers in the RIGK-G-SYSTEM for packaging of hazardous products and pass on the corresponding documentation to the authorities on request. In the same way, the amendment requires the use of recyclates and the separate collection of material flows. This is also part of our business model, from which our customers already benefit. We want to help protect and preserve our environment for future generations. And we do this with good ideas and consistent implementation.

Enjoy reading!

Best regards,  
**Markus Dambeck**

RIGK GmbH  
Chairman of Management

## REVISED PACKAGING ACT – RIGK CUSTOMERS FULLY PREPARED

In July 2021, the revised German Packaging Act is coming into force. There will be some important changes. RIGK customers already meet most of these demands through the return system.

## CONVENIENT COLLECTION, LEGALLY COMPLIANT DISPOSAL AND RESOURCE-SAVING RECYCLING

The RIGK-PICKUP-SYSTEM makes it really easy for end customers and packaging users. With this collection system RIGK organizes on-site collections. How it works exactly and which additional benefits the system offers is explained by Jens Dambeck, System Manager PICKUP.
