

RIGK Industry Reporter

Dear Sir or Madam

Subjects concerning recycling, saving resources, sustainability, ClosedLoop or Design for Recycling have gained importance in the past and will become increasingly far-reaching. For these reasons, we have decided to separate the RIGK Newsletter into the fields of Agricultural and Industry according to specific target groups.

We are all the more pleased today that you are now receiving the first edition of the RIGK Industry Newsletter. Not only will this inform you about recycling topics from RIGK, it will also always give you a comprehensive view of regulations, laws, trends and future questions concerning packaging, plastics and their recycling.

One important current legislative topic is the amendment to the German Packaging Act (VerpackG), which is associated with a lot of changes that will affect the manufacturers and distributors of packed goods. By taking part in the RIGK take-back systems you will be best equipped to meet all the relevant requirements. On our Booth 316 in Hall A6 during the IFAT Trade fair (from 30 May to 3 June 2022) RIGK will also be informing trade fair attendees about lots of innovations, explaining the new rules and providing advice on their implementation. We will also be available to give you advice through our normal communications channels.

For 30 years RIGK has contributed to saving resources, and thus to protecting the climate, with its take-back systems. We are also a little bit proud of this and are really pleased that we will be live at the IFAT to present our sustainable take-back systems. Let us take this as a positive sign – for the responsible further development of a society based on environmental and climate protection.

Because our actions now will decide the world of tomorrow!

Enjoy reading this newsletter.

Markus Dambeck
Geschäftsführer, RIGK GmbH

LUCID mandatory registration takes effect from 1 July 2022

The amendment of the Packaging Act has resulted in further changes. From 1 July 2022, all marketers of packaging filled with goods in Germany will be obliged to register in the public register LUCID.

Already since the beginning of May 2022, all manufacturers and distributors of packaging can carry out their registration or notification of change on the electronic data processing system of LUCID made available on the website of the ZSVR (German Central Agency packaging register).

RIGK actively supports its customers in the registration and notification process. A guide to registration prepared by us answers the most important questions.

On the home stretch for IFAT 2022 - RIGK looks forward to your visit

In less than two weeks, the time has finally come. Finally, trade fair again, real talks and meetings with customers! The IFAT trade fair will take place in Munich from 30 May to 3 June 2022 and RIGK will be there again. RIGK will be there with a large booth in Hall A6 316 and our team is looking forward to meeting you. At our booth, we will also be presenting a number of cooperation partners with whom we would like to lend more weight to our motto this year "Circular Economy Needs Cooperation". Another highlight is the 30th anniversary, which RIGK is celebrating this year and will of course also be celebrated at the trade fair. You can make an appointment for IFAT [here](#).

Recycling of filter cartridges with BRITA and RIGK

The family-owned company BRITA has been producing water filter systems for commercial and private users since 1966. To protect the environment and save resources, BRITA has set up a recycling system for filter cartridges from the commercial sector with the support of RIGK. Customers can return the cartridges free of charge; these are separated into their components and fed into the recycling process and processed into plastic recycle and new products.

Recovery of hazardous packaging and packaging of dangerous goods

RIGK is the specialist for the take-back of hazardous packaging and packaging of dangerous goods. With our take-back systems RIGK-G-SYSTEM and RIGK-PICKUP-SYSTEM we offer the suitable solutions for a legally compliant take-back. The Packaging Act places special requirements on the take-back and recycling process of this special packaging. With our systems, you always work in compliance with the law!

150 million t possible CO2 savings through more circular economy

A new study has calculated the influence of a strengthened circular economy on CO2 savings. According to the study, an annual saving of 150 million tonnes of CO2 EQ could be realised by 2035 by optimising and promoting the circular economy. The study was commissioned by the Federal Association of the German Waste Management, Water and Raw Materials Industry (BDL).

RIGK opens Twitter channel

As an active member of the circular economy, RIGK is committed to reporting as extensively as possible on topics such as plastics recycling or sustainability. This applies to the news content as well as the channels through which we connect with the public. To this end, RIGK now also regularly informs business partners, customers or generally interested parties about company-specific news on Twitter. But the focus here is also on tweets about general news from plastics recycling and sustainability.

RIGK recycling solutions for industry

Under the label RIGK Industry we bundle all take-back systems for customers from industry and trade. Here, three take-back systems form the basis of the recycling solutions for customers or manufacturers and distributors from industry and commerce: RIGK-SYSTEM, RIGK-G-SYSTEM and PICKUP-SYSTEM. In order to manage these systems, RIGK works with licence marks with which the participants mark their packaging and finance and ensure the take-back via a contribution.
