

## PRESS RELEASE

### RIGK at IFAT 2024: An Integral Approach to the Circular Economy

Wiesbaden, April 2024 - Ahead of IFAT 2024 (May 13th to 17th, Munich), RIGK emphasizes the importance of a holistic approach in plastic recycling. Current examples demonstrate the implementation of this process into the practice of collection and recycling. RIGK will be showcasing at Booth 316 in Hall A6 alongside [GVÖ Gebinde-Verwertungsgesellschaft der Mineralölwirtschaft](#), the [Kreislaufsystem Blechverpackungen Stahl GmbH \(KBS\)](#), [Sintac Recycling](#) subsidiary company [plastship GmbH](#).

*With the motto "Let's navigate our way towards a circular economy together!" RIGK emphasizes at IFAT the essential role of a comprehensive and cooperative approach in the field of plastic recycling. ©RIGK/MaeManee/Shutterstock.com*

#### **A Comprehensive Concept for the Plastic Cycle**

With the establishment of the PlastCert department, focusing on the certification of recyclability, recycled content, and recycling processes, as well as the integration of Hannawald Plastik GmbH in 2023, RIGK has completed its expertise along the entire value chain. Today, the scope of activities ranges from Design for Recycling to the licensing of packaging materials and the distribution of recyclates. In 2024, RIGK aims

to further expand this integral approach and thus its sustainable contribution to a functioning circular economy, aiming to increase collection volumes and recycling rates, and enhance the quality of rezyclates.

*RIGK is involved in all aspects of plastic recycling.

## Global Engagement and Expert Dialogue

Consulting projects in Europe and Chile demonstrate RIGK's commitment to a globally functional circular economy. At IFAT, visitors have the opportunity to engage in personal conversations with RIGK experts and learn about the latest developments and solutions. Our website provides information on the availability of contact persons.

## Sustainability in Focus

RIGK's carbon-neutral booth at the trade fair is another active commitment to environmental protection. By combining a certified climate protection project with tree planting initiatives in Germany, RIGK contributes to the creation of more resilient mixed forests, supporting sustainable development goals.
